

LUCKY KUMARI

Aspiring AI/ML Engineer | Python Developer

+91-7827843321 | kumarilucky01437@gmail.com | Delhi/NCR, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science student with a strong interest in Artificial Intelligence and Machine Learning. Proficient in Python, SQL, Machine Learning with hands-on experience building end-to-end ML solutions, recommendation systems, and predictive models. Completed AI/ML internships at CodSoft and Codomax, along with a Full Stack Development internship, gaining practical experience in developing real-world AI and software solutions. Passionate about solving real-world problems through data-driven approaches and seeking an AI/ML Internship or entry-level AI/ML Engineer role to apply technical skills, contribute effectively, and grow in a collaborative environment.

TECHNICAL SKILLS

Languages: Python, SQL, Java

Machine Learning & AI: Regression, Classification, Decision Tree, Random Forest, KNN, SVM, Naive Bayes, AdaBoost, XGBoost, SMOTE, Anomaly Detection, PCA, Clustering, Feature Engineering, Cross-Validation, Hyperparameter Tuning (GridSearchCV), Model Evaluation

NLP: TF-IDF, Text Processing, NLP Basics,

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, Streamlit

Tools: MySQL, Git, GitHub, Jupyter Notebook, Google Colab, VS Code, PyCharm, Power BI

WORK EXPERIENCE

AI & ML Intern — Codomax Digital Solutions

Jul 2026 – Aug 2026

- Developing and evaluating machine learning models in Python and Scikit-learn, performing data preprocessing, feature engineering, and model evaluation on real-world datasets.

Full Stack Development Intern — CodTech IT Solutions

Aug 2025 – Oct 2025

- Built a real-time chat application using WebSocket supporting 50+ concurrent users, and a collaborative multi-user document editor with conflict-resolution logic and zero data loss.
- Integrated a third-party weather REST API and launched a Chrome productivity-tracker extension for daily habit monitoring.

Artificial Intelligence Intern — CodSoft

Jul 2025 – Aug 2025

- Designed a rule-based NLP chatbot covering 20+ intent categories; built an AI Tic-Tac-Toe game using Minimax and a content-based movie recommender.

Technology Job Simulation | Deloitte (via Forage), Virtual

Jul 2025

- Completed 5 hands-on coding tasks in Deloitte's Technology Job Simulation, gaining exposure to real-world software engineering workflows.

PROJECTS

TalentLens AI | React, FastAPI, Python, TF-IDF, Random Forest, ANN, SQLite

[GitHub](#)

- Built a full-stack resume-intelligence platform that parses PDF/DOCX resumes and matches candidates to job descriptions using TF-IDF and cosine similarity.
- Implemented transparent ATS scoring, recruiter batch ranking, skill-gap recommendations, SQLite/SQLAlchemy persistence, and interview-practice workflows.

PDF-to-eCourse (GenAI) | Next.js, TypeScript, Groq API (Llama 3.3 70B), Supabase

[GitHub](#)

- Built an AI-powered platform that converts PDF documents into structured courses with chapters, topics, lessons, and key takeaways using the Groq API (GPT-OSS-120B).
- Implemented Google OAuth, PDF parsing, progress tracking, full-text search, an AI tutor chatbot, and AI-generated quizzes using Next.js, TypeScript, NextAuth.js, and Supabase.

Heart Disease Analytics & Risk Prediction | Python, Power BI, Pandas, scikit-learn, DAX, Random Forest

[GitHub](#)

- Analyzed 299 heart-failure clinical records and compared five mortality-prediction models; Random Forest achieved a 0.90 ROC-AUC.
- Integrated patient-level risk scores into an interactive Power BI dashboard with KPI cards, decomposition-tree analysis, and an AI risk-prediction page.

Fake News Detection | Python, NLP, TF-IDF, Streamlit

[GitHub](#)

- Trained a Logistic Regression model on 44,898 news articles using TF-IDF features, achieving 96.81% accuracy; deployed the app with Streamlit.

Voice SQL Insight Agent | Python, NLP, Speech Recognition

[GitHub](#)

- Built a voice-enabled SQL analytics agent that converts natural language questions into schema-validated, read-only SQL queries with conversational context support.

Movie Recommendation System | Python, TF-IDF, Streamlit

[GitHub](#)

- Developed a content-based recommendation system using TF-IDF and Cosine Similarity across 1,300+ Hollywood and Bollywood titles.

PUBLICATION

"Efficient Detection of Offensive Social Media Comments in Assamese Language Using LSTM" — International Research Journal of Computer Science (IRJCS), Vol. 12, Issue 12, Dec 2025

- Co-authored a Bi-LSTM-based framework for offensive comment detection.
- Compared performance with Naive Bayes, Logistic Regression, Random Forest, and SVM.

EDUCATION

B.Tech in Computer Science Engineering — IIMT University, Greater Noida (2023-2027)

SGPA: 8.81/10 (ongoing)

Intermediate (12th) — Sunrise Academy (2022–2023) | High School (10th) — Sunrise Academy (2020–2021)

CERTIFICATIONS & ACHIEVEMENTS

Oracle AI Foundation Associate (2025) • Machine Learning with Python (Infosys Springboard) • Generative AI in Software Development (IBM) • Programming in Java & Soft Computing (NPTEL) • SQL Basic Certification (HackerRank) • AI Tools & ChatGPT Workshop (Be10x) • AIML Workshop (CETPA Infotech)

Kaggle Titanic – ML from Disaster • EDTech 2024 Hackathon (Innomatics Research Lab) • Smart India Hackathon (SIH) – Internal Round • Deloitte Technology Job Simulation (Forage)

Currently Exploring: Deep Learning, NLP (Natural Language Processing), Large Language Models (LLMs), Fine-Tuning, Generative AI
